

Basic Information :

Name : Prof. Lobna Abdelaziz
Title : Head of Oral and Maxillofacial Surgery Department

Lobna Abdel Aziz Aly committed to excellence in education, clinical practice, and research. The department provides comprehensive training in oral surgery, dentoalveolar procedures, management of oral diseases, and maxillofacial trauma.

Through modern clinical facilities and evidence-based teaching, the department prepares students to become competent clinicians capable of delivering high-quality surgical care while contributing to scientific advancement and community oral health.

Education:

Certificate	Major	University	Year
PhD	Oral and Maxillofacial Surgery		2006
Masters			2000
Diploma	Oral Surgery and Local Anesthesia		1996
Bachelor			1993

Teaching Experience:

Name Of Organization	Position	From Date	To Date
FUE	Section Head	02/09/2007	Current
Misr University for Science and Technology	Lecturer	01/05/2006	01/01/2007
Misr University for Science and Technology	Lecturer Assistant	01/01/2003	01/01/2006

Researches / Publications :

Efficiency of osseodensification using densah bur versus reverse drilling technique on primary stability and bone density around dental implant: (Comparative clinical trial)

Assessment of bone gain and neurosensory affection with the sandwich osteotomy technique for vertically deficient posterior mandible using a full digital workflow versus conventional protocol: A randomized split mouth study

assessment of bone gain and neurosensory affection with the sandwich osteotomy technique for vertically deficient posterior mandible using a full digital workflow versus conventional protocol: A randomized split mouth study

Efficacy of Preemptive Dexamethasone and Diclofenac on Pain Control during Maxillary Alveolar Ridge Horizontal Augmentation: A Randomized Clinical Trial

Efficacy of Preemptive Dexamethasone and Diclofenac on Pain Control during Maxillary alveolar Ridge Horizontal Augmentation using Cortical Shell Augmentation Technique: A Randomized Clinical Trial

Clinical And Radiographic Assessment of Xenogenic Bone Graft With Or Without Hyaluronic Acid For Post Extraction Socket Preservation (Randomized Clinical Trial)

Treatment of Implant Labial Soft Tissue Dehiscence with Guided Bone Regeneration vs Subepithelial Connective Tissue Graft. A Randomized Clinical Trial

Advent of computer assisted surgery and its Application in oral Advent of computer assisted surgery and its Application in oral and maxillofacial surgery

Piezoelectric surgery: Applications in oral & maxillofacial surgery

Outcome of immediate implant placement with bone augmentation in the anterior maxillary supporting partial denture

The Outcome of Immediate Implant placement with Bone Augmentation in the Maxillary Esthetic Zone Supporting Removable Partial Denture

Botox as an adjunct to Lip repositioning for management of excessive gingival display in the presence of hypermobility of upper lip and vertical maxillary excess

Collagen turnover induced by cellular connective tissue cytokines of drug induced gingival overgrowth and hereditary gingival fibromatosis (Histological and immunohistochemical comparative study)

Gingival Bleeding Tendency in Liver Transplant Recipients Administered Immunosuppressive Drugs (A clinical and Immunohistochemical Comparative Study)

. Regenerative capacity of Local Intraoral Adipose Stem Cell with Demineralized Bone Matrix versus Autologous Bone Harvesting in Canine Alveolar Bone Defects

Maternal chronic oral infection with periodontitis and pericoronitis as a possible risk factor for preeclampsia in Egyptian pregnant women.(Microbiological and Serological study).

THE EFFICACY OF COMBINED APPLICATION OF INTRALESIONAL CORTISONE AND ADIPOSE DERIVED STEM CELLS IN THE QUALITY OF HEALING OF ORAL ULCERS

Efficacy of Equine Demineralized Bone Matrix in treating oral cyst following enucleation: A histologic and clinical study in humans

Regenerative capacity of Local Intraoral Adipose Stem Cell with Demineralized Bone Matrix versus Autologous Bone Harvesting in Canine Alveolar Bone Defects

Stem Cells: Sources, and Regenerative Therapies in Dental Research and Practice

Adipose Stem Cells as Alternatives for Bone Marrow Mesenchymal Stem Cells in Oral Ulcer Healing

Efficiency of systemic versus intralesional bone marrow-derived stem cells in regeneration of oral mucosa after induction of formocresol induced ulcers in dogs

The Efficacy of Combined Application of intralesional cortisone and Adipose Derived Stem Cells in the Quality of Healing of Oral Ulcer in Dogs

Maternal chronic oral infection with periodontitis and pericoronitis as a possible risk factor for preeclampsia in Egyptian pregnant women.(Microbiological and Serological study).

Collagen turnover induced by cellular connective tissue cytokines of drug induced gingival overgrowth and hereditary gingival fibromatosis. (Histological and immunohistochemical comparative study)

Adipose Derived Stem Cells As Alternatives For Bone Marrow Stem Cells In oral ulcer Healing

Intralesional Bone Marrow-Derived Stem cells in regeneration of oral mucosa after induction of formocresol-induced ulcers in dogs.

Adipose Derived Stem Cells As Alternatives For Bone Marrow Stem Cells In oral ulcer Healing

Influence of Autologus Adipose Derived Stem cells and PRP on regeneration of dehiscence-type defects in alveolar bone: A comparative histochemical and histomorphometric study in dogs

5. Speaker in 15th International Dental Congress.

Protein Expression Profiles of Collagen Turn-over in Gingival over growth induced by Immunosuppressive agents after liver Transplantation

The role of bone marrow-derived mesenchymal stem cells

Gingival Bleeding Tendency in Liver Transplant Recipients Administered

Influence of Flap Design on Peri-implant Interproximal Crestal Bone Loss Around Implants Placed Simultaneous With Localized Maxillary Ridge Expansion

2. Poster presentation in 2nd International Dental Conference.

3. Poster presentation in 2nd International Dental Conference

4. Poster presentation in 1st International Organ Transplantation Congress.

THE CONTRIBUTION OF ANAEROBIC BACTERIA AND TNF- ASSOCIATED WITH PERIODONTITIS AND PERICORONITIS IN THE PATHOGENESIS OF CHRONIC OBSTRUCTIVE PULMONARY DISEASE (COPD)

Marginal Bone Loss in Early Loading Dental Implants with

1. Speaker in 14th International Dental Congress

Chapter :

Clinical and radiographic assessment of xenogenic bone graft with or without hyaluronic acid for postextraction socket preservation.
A randomized clinical study
