Faculty of Engineering & Technology

Robot Control

Information :

Course Code :	MKT 472	**Level**	: Undergraduate	**Course Hours :**	3.00- Hours

Department :	Specialization of Mechatronics Engineering

Instructor Information :

Title	Name	Office hours
Lecturer	MOHAMED ABDELBAR SHAMSELDIN ALY	7
Lecturer	MOHAMED ABDELBAR SHAMSELDIN ALY	7
Teaching Assistant	Fady Ayman Mohamed Naguib Mahmoud Noah	3
Teaching Assistant	Fady Ayman Mohamed Naguib Mahmoud Noah	3

Area Of Study :

Develop the student's knowledge about different methods for path planning for robot manipulators.
Prepare students to apply different methods for controlling robot manipulators, including Fuzzy Logic Control.
Develop the student's knowledge about control of manipulators.
Train students to design, simulate, build, and test a robot manipulator.

Description :

Path and trajectory planning; Manipulator dynamics; Independent joint control; Force control; Geometric nonlinear control; Computer vision; Visual servo control; Fuzzy control; Robot control system design; Problem solving using up-ф Ёäæ^Á æ} åæåÂ ÛÐY Á[à[æR• Á[[|• ÁÇ ŒVŠŒ Ðí ÐÈ

Course outcomes :

a.Knowledge and Understanding: :

1 -	Define different terms used in classic and Fuzzy Logic Control.
2 -	List different methods for path planning of manipulators.
3 -	Explain Different methods for control robot manipulators.
4 -	Describe manipulator dynamics and computer vision.

b.Intellectual Skills: :

1 -	Analyze manipulators' dynamics.
2 -	Calculate parameters for a smooth trajectory, and optimum parameters for classic and fuzzy controllers of manipulators.
3 -	Select suitable parameters for robot controllers.
4 -	Analyze the results of different controllers for manipulators.

c.Professional and Practical Skills: :

1 -	Analyze lab experimental results of control manipulators with different control methods.
2 -	Use the suitable hardware components and software for drafting and implementing a simple manipulator.

Ô[ ] ˆ¦ǎ @ǿÁ ÁǤ€FHǍÏǑˇ čˇ¦^ÁV¸ ǎç^¦•ǎčˇÁ¸ÁÒˇˆ]œ̌ǑÆ¦Áǎ @•Á^•^¦ç^åÈ

| 3 - | Apply knowledge of mathematics, science, information technology, design and engineering practice integrally to identify, formulate and solve engineering and field problems related to Robot manipulators. |
| 4 - | Prepare technical reports and presentations. |

d.General and Transferable Skills: :

| 1 - | Search for information and engage in life-long self-learning. |

Course Topic And Contents :

Topic	No. of hours	Lecture	Tutorial / Practical
Path and trajectory planning	10	4	6
Manipulator dynamics; Independent joint control	8	4	4
Force control	8	4	4
Geometric nonlinear control	8	4	4
Computer vision; Visual servo control	10	6	4
Fuzzy control	8	4	4
Robot control system design	8	4	4

Teaching And Learning Methodologies :

Interactive Lecturing
Problem solving
Experiential learning
Discussion
Project
Research

Course Assessment :

Methods of assessment	Relative weight %	Week No	Assess What
Assignment	5.00		
Final Exam	40.00		
Mid- Exam 1I	15.00		
Mid- Exam I	15.00		
Project	10.00		
Quizzes	10.00		
Research	5.00		

Course Notes :

2. Lecture notes on the course Moodle page, FUE website.

Recommended books :

3. Recommended Readings: S. B. Niku, "Intruduction to Robotics, analysis, control, applications". John Wily and Son, 2nd edition
