

Faculty of Engineering & Technology

Applied Reservoir Simulation

Information :

Course Code : PET 511

Level : Undergraduate

Course Hours : 3.00- Hours

Department : Department of Petroleum Engineering

Instructor Information :

Title	Name	Office hours
Associate Professor	Adel Mohamed Salem Ragab	10
Lecturer	Mostafa Magdy El Sayed Abd El Hafiz	
Teaching Assistant	Taha Abdelhamid Abdelmaqsoud Abdelhamid Yehia	

Area Of Study :

- Define study objectives
- Data preparation and analysis
- Pre-simulation analysis (Analytical methods)
- Select simulator type
- Building static model
- Building dynamic model
- Reporting

Description :

Simulation of actual reservoir problems using both field and individual well models to determine well spacing, production effects of secondary and enhanced recovery processes, future rate predictions and recovery, coning effects, relative permeability adjustments and other history matching techniques.

Course outcomes :

a.Knowledge and Understanding: :

1 -	Review mathematics to construct different models of simulation study.
2 -	Utilize formation evaluations, well logging and well test analysis to prepare the data for simulation study.
3 -	Outline the principles of petroleum field development plan using simulation study.
4 -	Utilize the methodologies of solving reservoir simulation problems.
5 -	Outline the petroleum engineering technologies to advance the simulation study.

b.Intellectual Skills: :

1 -	Apply the principles of engineering science in developing solutions of the reservoir simulation equations.
2 -	Design actual simulation case studies in oil and gas reservoirs.
3 -	Identify saturation and pressure maps using simulation study.
4 -	Select the best method to be used in enhanced oil recovery (EOR) using simulation study.

c.Professional and Practical Skills: :

1 -	Apply partial differential and finite difference mathematical equations of simulation models.
-----	---

2 -	Carry out specialized engineering design of reservoir simulation projects.
3 -	Select well locations based on reservoir saturation maps from simulation study.
4 -	Deal with the high level of uncertainty of reservoir simulation different data.
5 -	Prepare technical reports of reservoir simulation studies.
6 -	Use commercial simulation software to select optimum EOR methods.

d.General and Transferable Skills: :

1 -	Collaborate effectively within multidisciplinary of reservoir simulation teams.
2 -	Communicate effectively to complete reservoir simulation study.
3 -	Lead and motivate individual of simulation study
4 -	Effectively manage tasks, time, and resources
5 -	Search for information to complete the simulation study.

Course Topic And Contents :

Topic	No. of hours	Lecture	Tutorial / Practical
Introduction to Reservoir Simulation study	6	3	3
Define study objectives	6	3	3
Geological & petro physical data	6	3	3
Fluid contact model	6	3	3
Relative perm & Capillary pressure model	9	6	3
Fluid phases model (PVT)	9	6	3
Vertical lift performance model	6	3	3
Pre-simulation reservoir evaluation , simulator selection, static &dynamic model construction	15	9	6
History matching/forecasting & Cases study	12	9	3

Teaching And Learning Methodologies :

Interactive Lecture
Discussion
Problem-based Learning

Course Assessment :

Methods of assessment	Relative weight %	Week No	Assess What
Assignments	15.00		
Final Exam	40.00		
Mid- Exam	25.00		
Participations	10.00		
Quizzes	10.00
